# Berrybank Stage 2 Wind Farm

## Community Update

Over the past month, the Berrybank Stage-2 Wind Farm site contractors along with GPG have been **collecting donations** for our annual site Christmas appeal. This year we have partnered with local charity 'A Helping Hand' which will ensure that our local kids can trust that Santa remembers them, and that everybody in our community is able to have a Christmas meal this year.

To date that site contractors and GPG have raised a total of **over \$5,000** with more donations coming in every day. If you would like to make a donation to 'A Helping Hand', please get in contact at: [www.ahelpinghand.com.au](http://www.ahelpinghand.com.au).

The poster features the 'A HELPING HAND' logo at the top center, flanked by two red starburst ornaments. Below the logo is the headline 'Give Someone Local A HELPING HAND This Christmas'. Two main call-to-action boxes are present: 'Fulfil a local child's Santa Wish or Donate a Gift' (with a gift icon) and 'Contribute to a Local's Christmas Meal' (with a plate icon). A central text block explains the organization's purpose: 'We know that so many people and businesses in our community would love to help, but it's difficult to know how to make a real difference for those in our community who need our support. This is why A Helping Hand has been created. A Helping Hand Christmas aims to ensure that our local kids can trust that Santa remembers them and that everybody in our community is able to have a Christmas meal this year. It connects anonymous requests from local community organisations and schools with community members and local businesses who wish to help a family or individual this Christmas.' The poster includes a Facebook icon and the text 'A Helping Hand Corangamite', the website 'www.ahelpinghand.com.au', a QR code, and a 'SCAN ME' button. At the bottom, it says 'Please spread the word by sharing with friends, family and business associates. We can do so much more together.'

## Construction Update

Civil construction has begun to wind down as they are nearing completion of the access track, hardstands, foundations and site drainage. The concrete contractors have now **completed pouring** all 26 Wind Turbine Generator Foundations and we have seen the continuation of components arriving on-site which include Tower Sections, Blades, Nacelles and Hubs, and have now seen the pre-installation of the **11 out of the 26** Wind Turbine Generators across the site and have completed the main installation of **5 out of the 26** Wind Turbine Generators.

The electrical contractors have been able to push on despite inclement weather that has occurred over the past month and have completed laying **40.1km out of the 62.4km** of underground medium voltage cables. Over the next month we will see **works commencing on the Transmission Line** to connect the Stage-2 Wind Farm to the grid. These works will include the installation of **3 new poles** and the stringing of the line, these works will join the works that have commenced at both the on-site and off-site sub-stations.

Over the coming months, we will see the continuation of **traffic control** measures on the local roads at various locations around the Berrybank Wind Farm Site where there will be upgrade works, drainage works or road crossings. As per the Traffic Management Plan, our contractors will ensure as little impact to the local traffic as possible
