Berrybank Stage 2 Wind Farm

Construction Update

Construction has been moving **forward** at a steady pace, despite the latest lockdowns. The concrete contractors have **completed** pouring **16** out of the 26 Wind Turbine Generator Foundations. The electrical contractors have been able to push on despite inclement weather that has occurred over the past month and have completed laying **26km** out of the 62km of underground medium voltage cables. We have also had the first shipment of components **arrive** at the Geelong Port, these components include **Tower Sections, Nacelles** and **Hubs**. Over the coming months, there will continue to be **traffic control** measures on the local roads at various locations around the Berrybank Wind Farm Site where there will be **upgrading works, drainage works or road crossings**. As per the Traffic Management Plan, our contractors will ensure as **little impact** to the local traffic as possible.

As a part of the Berrybank Stage-2 Wind Farm power purchase agreement (**PPA**) with the ACT government, **GPG has partnered with TransGrid** to build and install a **20MWh Battery Energy Storage System Plant (BESS)** that is to be located at the **Queanbeyan Substation** that will support the ACT distribution grid. On the **5th of August** marked the start of construction of the BESS with the excavation of the footings and the installation of the steel fixings for the **Battery Storage Containers** and **Equipment**.
